

Daniel Towers - Senior Administrator

Personal Profile:

My background for the last decade has been within compliance management across various providers within the healthcare sector. Originally, I trained as a biomedical scientist graduating in 2010 before moving into an operations management role within a pharmaceutical company. Following on from this, I have worked as compliance manager and CQC registered manager for multiple primary dental care providers.

I have extensive experience presenting data and evidence based reports to all levels of colleagues from operational staff to the board of directors, supporting steering group decisions. I enjoy using my analytical and problem solving skills to better the service we can provide to our clients and stakeholders.

Throughout my career, I have always made sure that we have the client's best interests at the heart of all that we do. This includes making compliance a part of our culture and living our core values every day to make sure that we are providing the safe, caring and efficient service that our clients and their families deserve.
